DIRECTORY OF AFRICAN SPECIALISTS IN STATISTICS
REPERTOIRE DES SPECIALISTES AFRICAINS EN STATISTIQUE

TABLE OF CONTENTS — TABLE DES MATIERES

	Page	
- Introductory note	iv - vii	- Note d'introduction
- Data processing	1	- Traitement des données
- Demographic and social statistics	1 - 11	- Statistiques démographiques et sociales
- General economic statistics	11 - 24	- Statistiques économiques générales
- Household surveys	24 - 30	- Enquêtes sur les ménages
- Statistical organization	30 - 37	- Organisation statistique
- Teaching of statistics	37 - 72	- Enseignement des statistiques

INTRODUCTORY NOTE

1. This Directory of African Specialists in Statistics has been prepared at the request of the tenth session of the Conference of African Statisticians. Such a publication is intended to enable the identification of African experts whose services might be used within the context of technical co-operation among developing countries (TCDC).

2. The information contained in this first issue refers to the position as communicated to the ECA Statistics Division by 1 April 1979. The secretariat regrets that a number of questionnaires, duly completed, were received after that date and could not be considered.

3. The criteria used for selection of the entries were as follows: a minimum of six years professional experience after the first degree (B.Sc in statistics or economics or equivalent) or 3-4 years of professional experience with a higher level degree (Ph.D, M.Sc in statistics or economics or equivalent). Persons holding degrees other than in statistics or economics but having considerable interest in statistics have also been considered.

4. This Directory contains the particulars of only 134 African specialists in the following fields, with the number of selected candidates indicated in brackets: data processing (1), demographic and social statistics (19), general economic statistics (26), household surveys (12), statistical organisation (12) and teaching of statistics (64). It should be noted that almost half (48 per cent) of the specialists listed are in the field of teaching and they thus deserve a special place. Also, although the specialists come from 23 African countries, only 15 countries have sent relatively comprehensive replies to the ECA request for relevant data. The remaining 8 countries have been included because of replies received from a few individual candidates, yet mainly in the field of teaching.

5. Taking into account this relatively unbalanced situation and the insufficient number of countries which responded, it has been decided to consider the present issue of the Directory as provisional and also to exclude from it, for the time being, the non-African specialists who have acquired extensive experience in the region. Information in respect of the latter as well as of African candidates not included in the present issue either due to the delay in receipt of their particulars or on the basis of duration of service is being kept on file for publication in due course.

6. The selected candidates are in principle classified in alphabetical order within the six fields of specialization mentioned in paragraph 4 above. The data are presented in the order below when the information is available :

1. Family name, first and other names
2. Sex
3. Year of birth
4. Nationality
5. Permanent address
6. Title of present post and date of assumption of duty
7. Description of present duties
8. Present employer
9. Office address
10. Previous posts and dates of assumption of duty
11. Education - university or equivalent (degrees, main course of study, year completed, institutions, place and country)
12. Field(s) of specialization
13. Areas of interest in statistics
14. Knowledge of languages (in addition to mother tongue)
15. Membership of any learned professional societies connected with statistics and related fields
16. Significant publications written (maximum 3)

7. It is the hope of the secretariat that, despite its shortcomings, this provisional issue of the Directory of African Specialists in Statistics will be useful to interested Governments, agencies, intitutions and individuals and that the next issue will be far more complete and show improvements.

NOTE D'INTRODUCTION

Ce Répertoire des spécialistes africains en statistique a été préparé à la demande de la Conférence des statisticiens africains à sa dixième session. L'objet d'une telle publication est de permettre l'identification des experts africains dont les services pourraient être utilisés dans le cadre de la coopération technique entre les pays en voie de développement.

Les renseignements contenus dans ce premier numéro se réfèrent à la situation telle qu'elle a été communiquée à la Division de la statistique de la CEA à la date du 1er avril 1972. Le secrétariat regrette que certains questionnaires dûment remplis ont été reçus après cette date et n'ont pas pu être pris en considération.

Les critères qui ont été utilisés pour sélectionner les candidats sont les suivants : six années d'expérience professionnelle au minimum après l'obtention du diplôme d'ingénieur des travaux statistiques (ou d'un diplôme équivalent) ou 3 à 4 années d'expérience professionnelle avec le diplôme d'ingénieur statisticien-économiste ou un diplôme équivalent. On a néanmoins considéré les personnes qui sont titulaires de diplômes dans des disciplines autres que la statistique mais qui ont un vif intérêt pour la statistique.

Ce Répertoire contient les renseignements concernant seulement 87 spécialistes africains dans les domaines ci-après (les chiffres entre parenthèses indiquent le nombre de candidats sélectionnés) : traitement des données (1), statistiques démographiques et sociales (19), statistiques économiques générales (26), enquêtes sur les ménages (12), organisation statistique (64). Il faudrait noter que presque la moitié (48 p. 100) des spécialistes retenus sont dans le domaine de l'enseignement et ceux-ci font l'objet d'une mention spéciale. En outre, bien que les spécialistes figurent dans les questionnaires de 23 pays africains, 15 pays seulement ont répondu de façon relativement complète à l'enquête de la CEA en vue de l'obtention des renseignements nécessaires. Les 8 pays restants ont été inclus à la suite de demandes de quelques candidats à titre individuel, de nouveau dans le domaine de l'enseignement principalement.

Compte tenu de cette situation relativement disproportionnée et du nombre insuffisant de pays qui ont participé à l'enquête, il a été décidé de considérer le présent numéro du Répertoire comme provisoire et d'y inclure, pour le moment, les spécialistes non africains ayant des expériences étendues dans la region. Les renseignements relatifs à ces derniers ainsi que ceux relatifs aux candidats africains non inclus dans le présent numéro, soit en raison des retards dans la réception soit sur la base de la durée de service, sont gardés dans le dossier d'être publiés en temps opportun.

6. Les candidats sélectionnés sont en principe classés par ordre alphabétique à l'intérieur des six domaines de spécialisation mentionnés au paragraphe 4 ci-dessus. Les renseignements sont présentés dans l'ordre indiqué ci-après dans la mesure de leur disponibilité :

1. Nom de famille, prénom usuel et autres prénoms
2. Sexe
3. Année de naissance
4. Nationalité
5. Adresse permanente
6. Désignation exacte du présent emploi et date de prise de fonction
7. Description du travail
8. Nom de l'employeur
9. Adresse de l'employeur
10. Emplois antérieurs et dates de prise de fonction
11. Etudes - enseignement supérieur (diplômes, sujet d'étude principal, année d'obtention, nom de l'établissement, ville et pays)
12. Domaine(s) de spécialisation
13. Domaines d'intérêt en statistique
14. Connaissance des langues (en plus de la langue maternelle)
15. Associations professionnelles s'occupant de problèmes statistiques ou de sujets connexes dont le candidat est membre
16. Ouvrages importants qui ont été publiés (maximum 3)

7. Le secrétariat espère que, malgré ses lacunes, cette édition provisoire du Répertoire des spécialistes africains en statistique sera utile aux gouvernements, organisations, institutions et particuliers intéressés et que la prochaine édition sera beaucoup plus complète et comportera des améliorations.
